WORK EXPERIENCE

CETPA INFOTECH PVT LTD

Data Science intern

04/2024 - 08/2024

- Improved dataset quality by 25% through effective data preprocessing and feature engineering techniques.
- Utilized Python (Pandas, NumPy, Matplotlib) for data manipulation and visualization, resulting in a 40% increase in meaningful insights.

EDUCATION

Centre for Development in Advanced Computing (CDAC ACTS Pune)

PG-DESD (Diploma Embedded System & Design) - 80.75

02/2025 - 08/2025

Institute of Engineering & Technology Faizabad

B.Tech (Electronics & Communication Engineering) - 75.21

12/2020 - 08/2024

ST-Anthony public school alambagh lucknow UP

CBSE - XII - 74.6

04/2017 - 05/2019

Lucknow Public School

ICSE - X - 70.6

04/2015 - 05/2017

PROJECTS

CAN-BASED SMART VEHICAL SUB-SYSTEM SIMULATION & DIAGNOSTICS

06/2025 - 08/2025

- Developed a real-time vehicle health monitoring system integrating sensors for RPM, temperature, and speed data collection, resulting in a 25% reduction in vehicle downtime.
- Implemented CAN Bus communication with STM32F407VGT6 and BeagleBone Black, achieving a seamless data transmission rate of 99.99%.
- Logged sensor data into CSV files and applied machine learning techniques for predictive fault detection, enabling early intervention and reducing maintenance costs by 30%.
- Built alert mechanisms via dashboard, cloud, and mobile/email notifications, resulting in a 95% increase in early intervention and improved vehicle safety.

SKILLS

- Programming & Tools:** C, C++, Embedded C, Python (Basics)
- Embedded Systems:** STM32 (Cortex-M), BeagleBone Black, ARM Microcontrollers, Embedded Linux, Operating System, RTOS
- Protocols & Interfaces:** CAN, UART, SPI, I2C, GPIO, ADC, PWM
- IoT & Automation:** ESP32, MQTT, HTTP, COAP, AWS-IOT, Cloud Integration
- Other:** GitHub, Problem-Solving, Team Collaboration

CERTIFICATE

DATA SCIENCE(Python, EDA with (Pandas, matplotlib, seaborn, NumPy))

LANGUAGE

HINDI
