Education

MVJ College Of Engineering

Bachelor of Technology in Computer Science | CGPA: 9.2

Dec. 2022 - Apr. 2026

Bengaluru, Karnataka

Government Pre-University (PU) College

Higher Secondary in PCMB | Percentage: 91.67%

Jul. 2020 - Apr. 2022

Sagar, Karnataka

Experience

Software Development Intern

Exposys Data Labs

Jul. 2025 - Aug. 2025

Bengaluru, Karnataka

- Developed an E-learning platform using **Spring Boot, MySQL, and REST APIs**, enabling a **30% improvement in scalability** and ensuring secure backend services.
- Maintained a clean and efficient codebase under senior guidance, reducing **bug occurrence by 20%** through adherence to industry best practices.
- Implemented user authentication and course management modules, improving **system reliability and security for 200+ active users**.
- Collaborated with cross-functional teams to integrate UI/UX requirements, resulting in a **25% increase in learner engagement** and a smoother user experience.

Projects

SmartShop | Java, Spring Boot, Thyme leaf, MySQL, Spring Security, MVC

- SmartShop** is a **business management system** built with **Java, Spring Boot, MVC architecture, and Thyme leaf**, enabling CRUD operations for customers, inventory, and orders.
- It integrates with a **MySQL database** using externalized configurations to ensure scalability, maintainability, and seamless data handling.
- The application is secured with **Spring Security** and **role-based access control** for admins and staff.

Quiz Application | Java, Spring Boot, Spring MVC, Maven, MySQL/PostgreSQL, H2 Database, JUnit, REST API

- Engineered a full-stack quiz management system using **Spring Boot MVC architecture**, enabling **CRUD** operations for quizzes and questions via **RESTful APIs**, reducing manual quiz setup effort by **70%**.
- Implemented **layered architecture** (Controller, Service, DAO) to ensure clean separation of concerns, improving code maintainability and scalability for future features.
- Integrated **multi-database support** (H2 for testing, MySQL/PostgreSQL for production) with externalized configurations, allowing seamless environment switching and developed and executed **unit tests with Junit** to ensure code reliability

AI-Powered IT Workflow Automation System

- Currently working** on **Cognitive Task Automation**, a productivity platform that integrates **AI-powered email organization, calendar scheduling, daily routine generation, and workload analytics** to streamline IT workflows.
- The system leverages **Spring Boot, NLP** techniques, and a **chatbot** interface to enable smart email summarization, translation, and automated task management.
- Designed with a **modular architecture and interactive dashboard**, it enhances efficiency by automating repetitive IT tasks and providing actionable insights in real time.

Technical Skills

- Programming Languages:** Java, Python, SQL, C, HTML, CSS
- Databases:** MySQL, PostgreSQL, H2, MongoDB, DBMS
- Frameworks and Libraries:** Spring Boot, Spring MVC, Junit, Thyme leaf, Pandas, NumPy, Matplotlib
- Developer Tools:** Eclipse IDE, IntelliJ IDEA, VS Code, IntelliJ IDEA, Postman Git, GitHub, Maven, Docker, Kubernetes
- Core Backend Concepts:** RESTful APIs, Microservices, Authentication & Authorization, Exception Handling, Unit Testing, CI/CD Basics

Achievements / Extracurricular

- Honor's Degree** along with Computer Science & Engineering, demonstrating strong technical foundation
- Presented innovative Digital Signature idea at **IDEATHON 2024**
- Certified in **Advanced Java (IIT Bombay)**, **Python for Data Science (IBM)**, **Microsoft Assure (MVJCE)**, and Power BI (Microsoft)
- Attended **Seventh Sense** training for verbal communication and logical reasoning

Certifications

- Java DSA Course - Master the Fundamentals and Beyond | **Scaler**
- Java Training course | **IIT Bombay**
- Getting Started with Competitive Programming | **VTU**
