paul.dipika0307@gmail.com | [+91 7973715339](tel:+917973715339) | [LinkedIn](#) | [Topmate.io](#) | [GitHub](#)

Summary

Aspiring Software Developer with strong foundations in Java, Python, and SDLC. Experienced in Android development, API integration, data analysis, and software testing. Skilled in Git/GitHub, debugging, and Agile workflows, with hands-on projects in Android, Python, and applied AI. Passionate about problem-solving, collaboration, and building impactful applications.

Skills

Programming Languages: Python, Java, Kotlin, Object-Oriented Programming (OOP)

Frameworks & Tools: Android Studio, Git/GitHub, Postman, Pytest, NumPy, Pandas, Matplotlib, Seaborn

Technologies: RESTful API Integration, Room Database, Machine Learning, Natural Language Processing (NLP), Data Visualisation, Generative AI (OpenAI API, HuggingFace)

Android Development: Jetpack Libraries, MVVM Architecture, LiveData, ViewModel, RecyclerView, Material Design, Retrofit, Firebase

Development Practices: Agile Methodology, SDLC, Debugging & Testing, Version Control

Soft Skills: Problem-solving, Analytical Thinking, Adaptability, Collaboration, Creativity, Attention to Detail

Work Experience

Freelance Python Instructor / Career Mentor - [Topmate.io](#)

Remote | [Visit Profile](#)

Jan 2024 – Present

- Delivered 1:1 personalised sessions on Python and Data Science (NumPy, Pandas, Matplotlib, ML basics), boosting learners' coding proficiency.
- Designed structured learning paths and coding exercises aligned with real-world software development practices.
- Mentored 20+ learners in debugging, project development, and career preparation (ATS resumes, LinkedIn optimisation), resulting in successful placements at top companies including Google, Wipro, and early-stage startups.

Technical Research Analyst - [Experience Letter](#)

Intellipaate Software Solutions Pvt. Ltd. | Bengaluru, Karnataka, India

Mar 2023 - Aug 2023

- Performed data analysis using Python, Pandas, and NumPy to generate actionable business insights.
- Designed & deployed ML models that improved decision-making efficiency by 20% across projects.
- Collaborated within a 30+ member team on machine learning and AI-based initiatives, contributing to continuous learning and innovation in data-driven problem-solving.
- Conducted industry expert sessions on Python/Data Science for 300–400 learners per weekend.

Android Developer Intern - [Experience Letter](#)

Ominous Software Solutions Pvt Ltd | Chandigarh, Punjab, India.

Oct 2022 - Mar 2023

- Developed Android app features using Java, Kotlin, MVVM, and Jetpack libraries, enhancing UI/UX.
- Integrated REST APIs (Retrofit + Postman) and debugged 50+ bugs, improving app stability.
- Refactored codebase and optimised key modules, boosting app performance by 10%.

Projects

HealthTrack Android App (Java/Kotlin, Firebase, MVVM)

Objective: A healthcare app enabling secure prescription management, user authentication, and medicine reminders.

AI-Powered Resume Analyzer (Python, NLP, Flask, HuggingFace)

Objective: An ATS-friendly resume analyzer that extracts key skills, compares with job descriptions, and suggests improvements.

Movie Recommendation System (Python, Pandas, Scikit-learn, Streamlit)

Objective: Machine learning-based recommendation engine predicting user preferences with collaborative filtering.

Certifications

Cisco Certified Network Associate (CCNA) 200 - 301 - [Training Basket](#)

Currently Pursuing

Education

DAV Institute of Engineering and Technology, Jalandhar, Punjab, India

B.Tech IT | CGPA: 8.8

2019 - 2023

Army Public School, Jalandhar Cantt, Punjab, India

CBSE (Class XII) | Percentage: 78%

2017 - 2019

Army Public School, Jalandhar Cantt, Punjab, India

CBSE (Class X) | Percentage: 80%

2015 - 2016
